

Frequently Asked Questions

COR Transit Overview

What is COR Transit?

COR Transit is a new heavy-duty transit bus manufacturer, developed by ABC Companies, created to bring greater choice, competition, and long-term support to the North American public transit market.

What led to its creation?

It began with what ABC heard from transit agencies: aging fleets, longer lead times, rising costs, and a need for more choice. COR Transit is ABC's long-term commitment to helping address those needs.

How is COR Transit connected to ABC Companies?

COR Transit is a separate manufacturer. ABC will serve as its dealer and support partner, drawing on more than 50 years of experience serving transportation operators through vehicle distribution, parts, service, refurbishment, training and technical support.

Will ABC continue working with its other manufacturer partners?

Yes. ABC will continue representing and supporting its existing OEM partners and serving customers with fleets made up of multiple vehicle brands.

What is the first COR Transit vehicle?

The first product is the D40, a 40-foot heavy-duty diesel transit bus designed for the North American market. Its development is underway, with prototype activity targeted for 2027 and initial deliveries planned for 2028.

What will visitors see at APTA?

ABC is introducing COR Transit and sharing conceptual renderings of the first bus. The vehicle is in development, and ABC will share more as it progresses through design, testing and production.

Frequently Asked Questions

Vehicle Development & Support

What is guiding the bus's development?

ABC is bringing what it has learned from agencies, operators and maintenance teams into the design process. The goal is a reliable bus that is practical to operate and maintain, with parts and support considered throughout its life.

How will COR Transit buses be supported after delivery?

ABC will bring its existing parts distribution, service facilities, mobile service, training and technical support capabilities to COR Transit. ABC also works with component and supplier partners across the passenger transportation industry.

Where will COR Transit buses be manufactured?

Manufacturing is planned for the United States. COR Transit is in the final selection stage of potential sites with a focus on building a lasting operation, developing a skilled workforce and establishing strong supplier relationships.

What is the plan for Buy America and Altoona testing?

The bus is being developed to meet applicable Buy America requirements and is planned to complete the required Altoona testing process as development moves toward production.

Will financing or leasing be available?

ABC has in-house financial services through ABC Financial Services, and can discuss financing and leasing options with customers based on their needs.

How can agencies and media stay informed?

Visit CORtransit.com to sign up for updates as the program progresses. Media inquiries can be directed to Kiran Kaur at ABC Companies via kkaur@abc-companies.com or 1-800-222-2871.
